

# J-ALERT Information Transmission

J-ALERT transmits messages in the following way:

(Note) The message is broadcasted only in Japanese.

# (1) If a missile is likely to fall on Japanese land or territorial waters

## Ballistic Missile Launch

### [1] Information of ballistic missile launch/Instruction to take shelter

“Missile launch. Missile launch. North Korea appears to have launched a missile. Take shelter in a sturdy building or underground.”

\* First, we inform of the missile launch and instruct people to look for shelter.

**When outdoors, take shelter in a building (sturdy buildings as those made of concrete are better, but if there are none, any other building is fine) or underground (underground facilities such as underground shopping arcades or subway stations) nearby.**

**When indoors, if there is a sturdier building or underground facility to where you can quickly evacuate, take shelter in that place. If there is none, stay indoors and move as far away as possible from windows, or, if there is one, to a room without windows.**

### [2] Instruction to take shelter immediately

“Evacuate immediately. Evacuate immediately. Take shelter in a building or underground immediately. A missile may fall. Take shelter immediately.”

\* When it is noticed that a missile is likely to fall on Japanese land or territorial waters, citizens are instructed to take shelter immediately.

**When outdoors, take shelter in a building or underground immediately. If there is no appropriate building, etc. nearby, hide under anything that may provide shelter or lie flat on the ground covering your head.**

**When indoors, move as far away as possible from windows or, if there is one, to a room without windows.**

### [3] Information on the impact zone, etc. (if having fallen on Japanese land or territorial waters)

“Missile impact. Missile impact. A missile appears to have fallen on the XX region. Wait for more information and do not leave the shelter.”

\* If a missile is likely to have fallen on Japanese land or territorial waters, the information on the impact zone, etc. will be transmitted. **Do not leave the shelter**, and wait for further information to be transmitted.

## (2) If a missile has passed through the skies of Japanese land or territorial waters

### Ballistic Missile Launch

#### [1] Information on missile launch/Instruction to take shelter

“Missile launch. Missile launch. North Korea appears to have launched a missile. Take shelter in a building or underground.”

- \* First, we inform of the missile launch and instruct people to look for shelter.

**When outdoors, take shelter in a building (sturdy buildings as those made of concrete are better, but if there are none, any other building is fine) or underground (underground facilities such as underground shopping arcades or subway stations) nearby.**

**When indoors, if there is a sturdier building or underground facility to where you can quickly evacuate, take shelter in that place. If there is none, stay indoors and move as far away as possible from windows, or, if there is one, to a room without windows.**

#### [2] Information on missile passage

“Missile has passed. Missile has passed. The missile appears to have passed from the XX region to the XX region. If you find any suspicious objects, do NOT approach, and report it to the police or fire department immediately.”

- \* If it is confirmed that the missile has passed through Japanese skies, this information will be transmitted.

**There is no need to stay inside the shelter,** but if you find any suspicious objects, do not approach, and report it to the police, fire department or the Japan Coast Guard immediately.

### (3) If a missile lands outside Japanese territorial waters

## Ballistic Missile Launch

### [1] Information on missile launch/Instruction to take shelter

“Missile launch. Missile launch. North Korea appears to have launched a missile. Take shelter in a building or underground.”

\* First, we inform of the missile launch and instruct people to look for shelter.

**When outdoors, take shelter in a building (sturdy buildings as those made of concrete are better, but if there are none, any other building is fine) or underground (underground facilities such as underground shopping arcades or subway stations) nearby.**

**When indoors, if there is a sturdier building or underground facility to where you can quickly evacuate, take shelter in that place. If there is none, stay indoors and move as far away as possible from windows, or, if there is one, to a room without windows.**

### [2] Information on impact zone, etc. (if having fallen in waters outside Japanese territorial waters)

“The missile appears to have fallen on the XX sea. If you find any suspicious objects, do not approach, and report it to the police or fire department immediately.”

\* If it is estimated that the missile has not reached Japan and has fallen in waters outside Japanese territorial waters, the information above will be transmitted.

**There is no need to stay in the shelter**, but if you find any suspicious objects, do not approach, and report it to the police, fire department or the Japan Coast Guard immediately.

(Note 1) Since messages are sent according to the situation, all messages above are not necessarily sent.

(Note 2) The messages above may change according to the situation.

(Note 3) If the Self-Defense Forces intercept the missile and in other similar cases, the information transmission flow may change.
