

What to Do If Someone in Your Department Tested Positive

- **When** did the positive person first begin experiencing symptoms?
- Who were the positive person's contacts during **2 days before onset?**
- Were **both** wearing a **mask** during the contacts?
- Did the **contacts** last **for 15 min. or more?**
- What is the **current physical condition** of the contacts?
- How high is **treatment and care level** of the positive person?

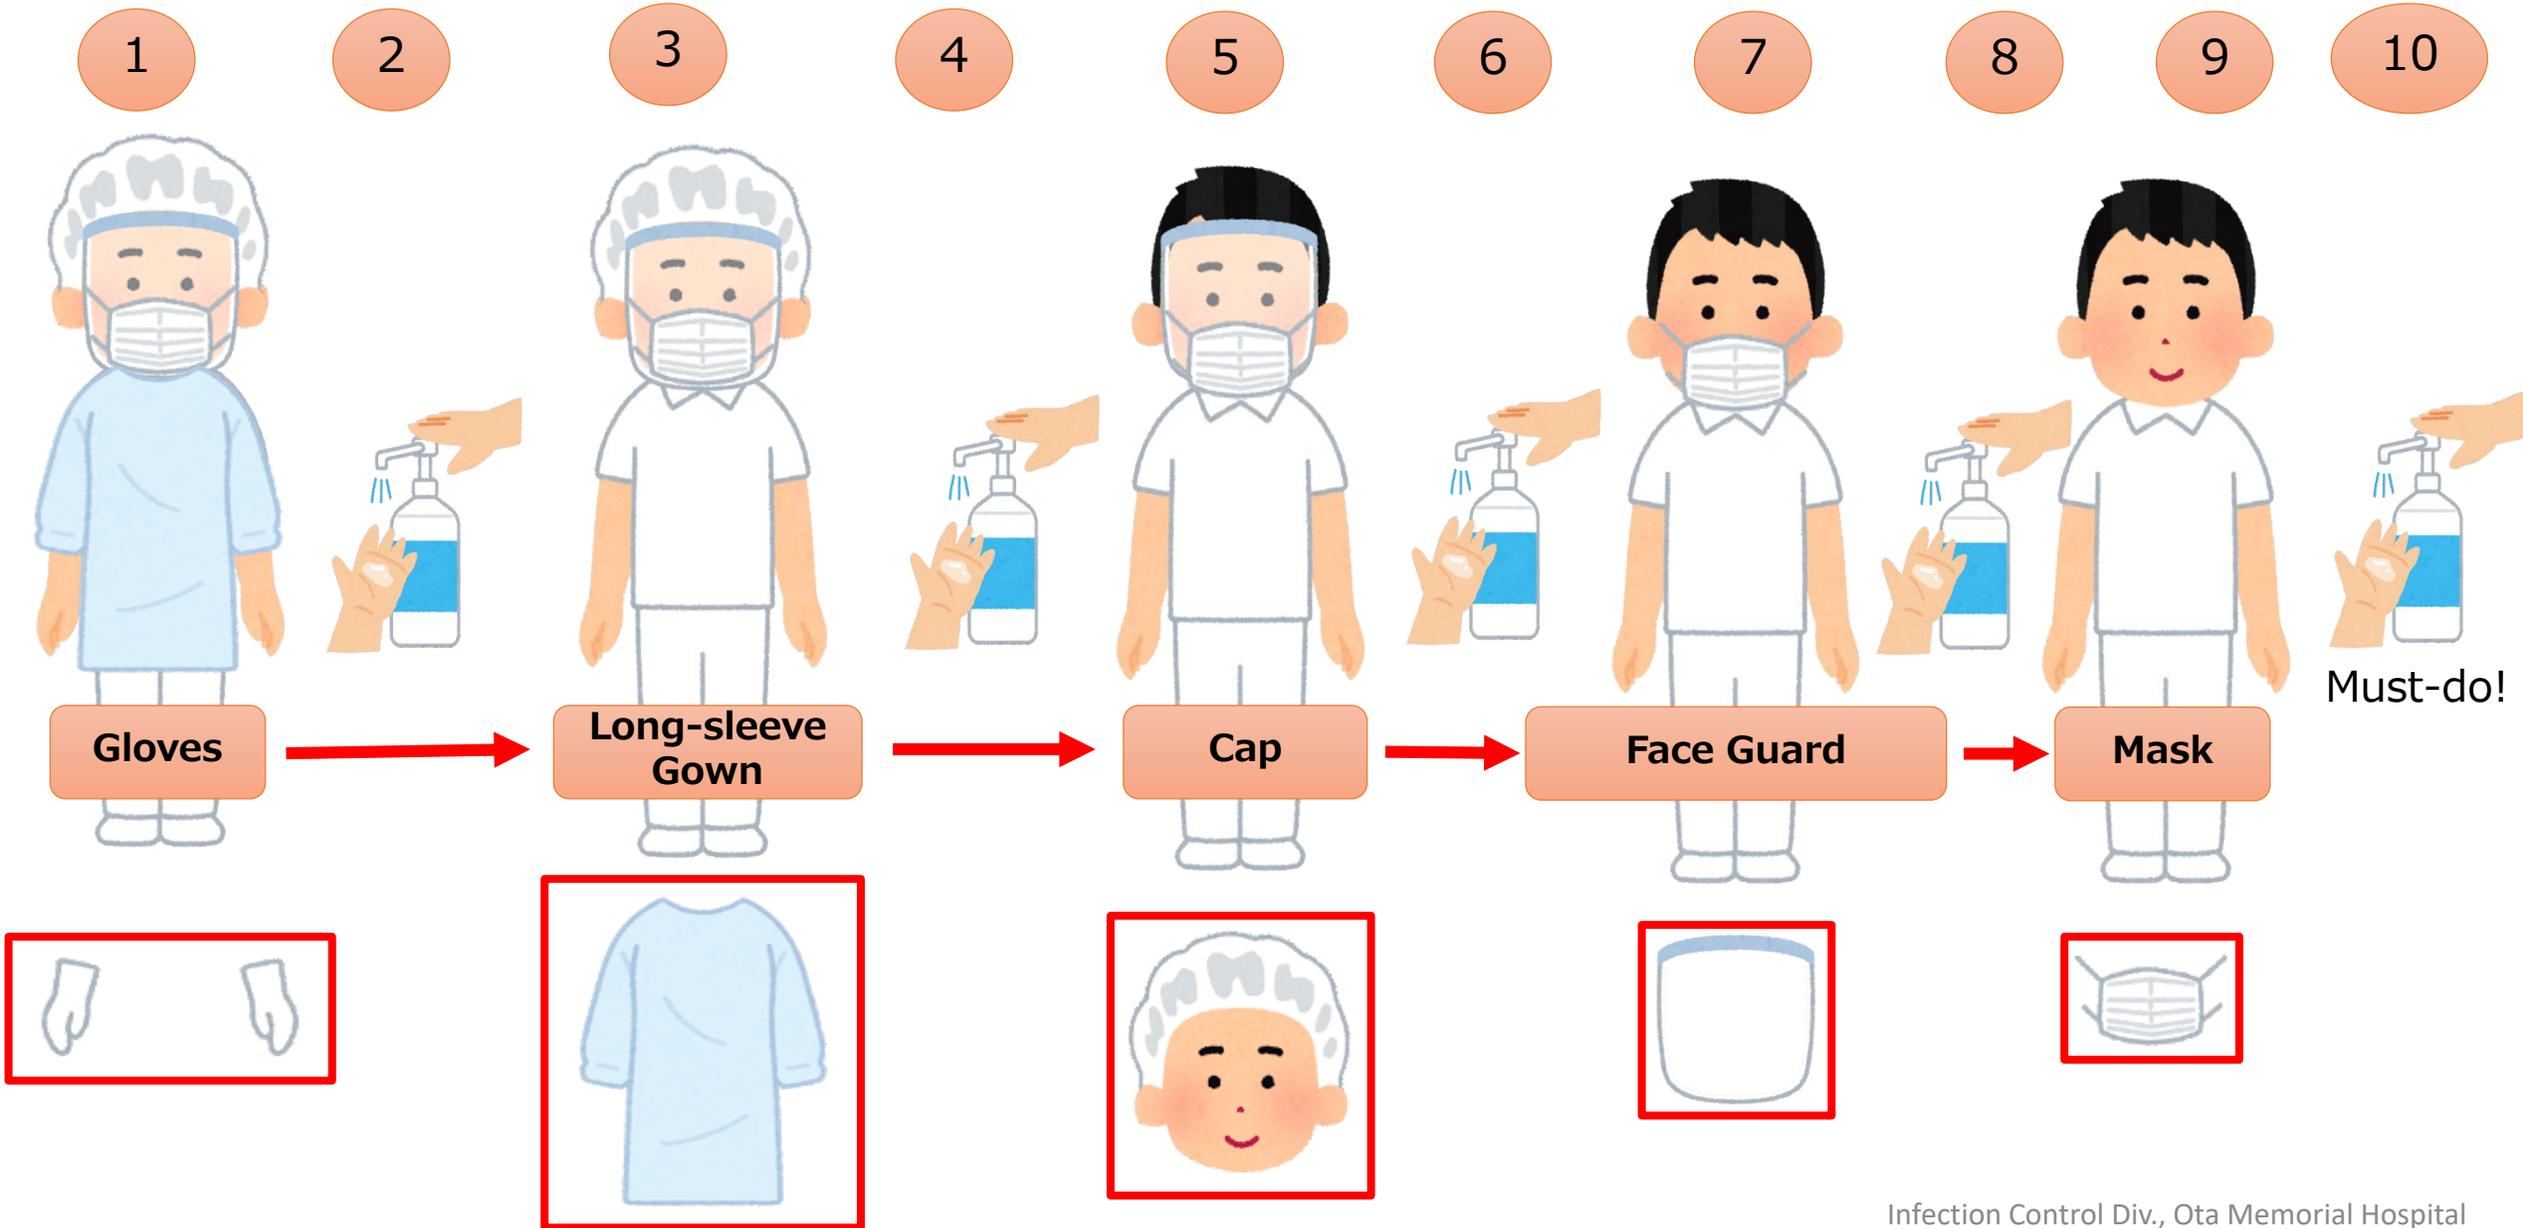

Prompt response can minimize infection spread.

5 Moments for Handwashing

**1 and 4 must be done necessarily
Otherwise, infection will spread**

Undressing Procedure

How to take off gloves

Hand hygiene

※If your sleeve got caught on your thumb, unhook the sleeve hooks first.

※Stretch your hands so as not to touch your clothes.
